Electronic Lab Reporting Undercount Today

DOH reports 29 new cases of coronavirus today. There was one (1) additional death of an O'ahu man, 70-79-years-old, who had underlying conditions and passed away in the hospital.

For a second day, a temporary interruption in electronic laboratory reporting (ELR) caused cases to be undercounted. The DOH Disease Outbreak and Control Division (DOCD) notes all reporting feeds were re-established yesterday by 3:30 p.m. and DOCD expects to see catch-up reporting of additional cases over the next one to two days.

This report includes cases up until Monday at 11:59 p.m. Full data is posted on the State COVID-19 dashboard and on the DOH Disease Outbreak & Control Division website daily: HawaiiCOVID19.com/data-dashboard.
